Mediana sms api (1.0.1)

Download OpenAPI specification: Download

mediana sms api doc
sdks for some programming languages is in out github at https://github.com/medianasms
api-key format: `Authorization: "AccessKey your-api-key"`

Authentication

ApiKeyAuth

Security Scheme Type	API Key
Header parameter name:	Authorization

auth

GetAuthorizedUser

get authorized user

Responses

200 ok

RESPONSE SCHEMA: application/json
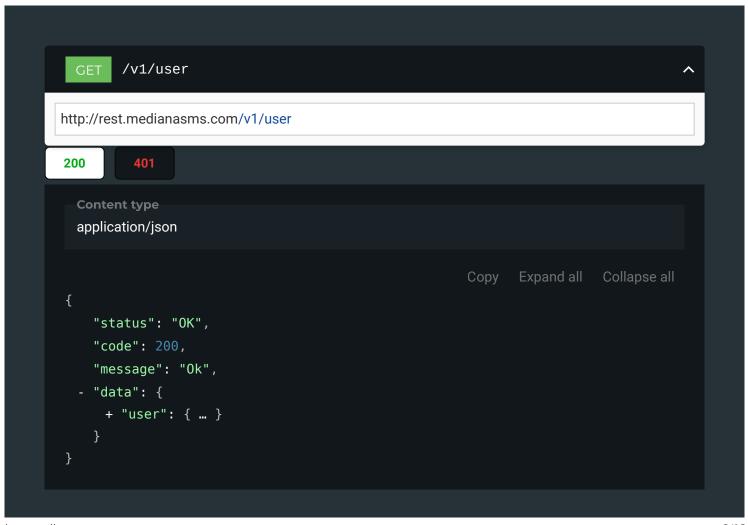

status   string

code   integer

message   string

data >   object

401 unauthorized

GET   /v1/user   ^

http://rest.medianasms.com/v1/user

200   **401**

Content type

application/json

                                          Copy   Expand all   Collapse all

```
{
    "status": "OK",
    "code": 200,
    "message": "Ok",
-   "data": {
      + "user": { … }
    }
}
```

credit

GetCredit

get user credit

Responses

> **200** ok

> **401** unauthorized

| GET | `/v1/credit` | ⌃ |

http://rest.medianasms.com/v1/credit

| **200** | **401** |

Content type

application/json

Copy   Expand all   Collapse all

```
{
    "status": "OK",
    "code": 200,
    "message": "Ok",
```

```
   - "data": {
        "credit": 9999937780
     }
}
```

messages

SendSMS

send SMS

REQUEST BODY SCHEMA: application/json

parameters

| originator required	string your line number to send message from that
recipients required	Array of strings recipients number
message required	string message to send

Responses

> **200** ok

> **401** unauthorized

| POST | /v1/messages | ⌄ |

Request samples

Payload

Content type
application/json

Copy   Expand all   Collapse all

```
{
    "originator": "+9850002",
  - "recipients": [
        "989123456789",
        "989125554433"
    ],
    "message": "mediana is awesome"
}
```

Response samples

| 200 | 401 |

Content type
application/json

Copy   Expand all   Collapse all

```
{
  - "value": {
        "status": "OK",
        "code": 200,
        "message": "Ok",
      + "data": { … }
    }
}
```

CreatePattern

create message pattern

REQUEST BODY SCHEMA: application/json

parameters

| pattern | string |
| required | pattern template |

| description | string |
| | pattern description |

| is_shared | boolean |
| | determine that pattern shared or not |

Responses

> **200** ok

> **401** unauthorized

POST   /v1/messages/patterns ⌄

Request samples

Payload

Content type

application/json

Copy   Expand all   Collapse all

```
{
    "pattern": "Hello %name%",
```

```
        "description": "greeter pattern",
        "is_shared": false
    }
```

Response samples

200   401

Content type
application/json

Copy   Expand all   Collapse all

```
{
  - "value": {
        "status": "OK",
        "code": 200,
        "message": "Ok",
      + "data": { … }
    }
}
```

SendPattern

send pattern SMS

REQUEST BODY SCHEMA: application/json

parameters

┤ **pattern_code**
  required

string
pattern code

┤ **originator**
  required

string
your line number to send message from that

┤ **recipient**
  required

string
recipient number

└ **values**
  required

object

pattern values

Responses

> **200** ok

> **401** unauthorized

POST	/v1/messages/patterns/send	⌃

http://rest.medianasms.com/v1/messages/patterns/send

Payload

Content type

application/json

Copy   Expand all   Collapse all

```
{
    "pattern_code": "t2cfmnyo0c",
    "originator": "+9850002",
    "recipient": "+989123459900",
  - "values": {
        "name": "Mohamad"
    }
}
```

Response samples

200	401

Content type

application/json

Copy   Expand all   Collapse all

```
{
  - "value": {
      "status": "OK",
      "code": 200,
      "message": "Ok",
    + "data": { … }
    }
}
```

GetSMS

get a sms properties

PATH PARAMETERS

⊣ bulk_id
  required

integer <int64>
Example: 52738671

Responses

> **200** ok

> **401** unauthorized

| GET | /v1/messages/{bulk_id} | ⌄ |

Response samples

| 200 | 401 |

Content type
application/json

```
                                    Copy    Expand all   Collapse all
{
    "status": "OK",
    "code": 200,
    "message": "Ok",
  - "data": {
      + "message": { … }
    }
}
```
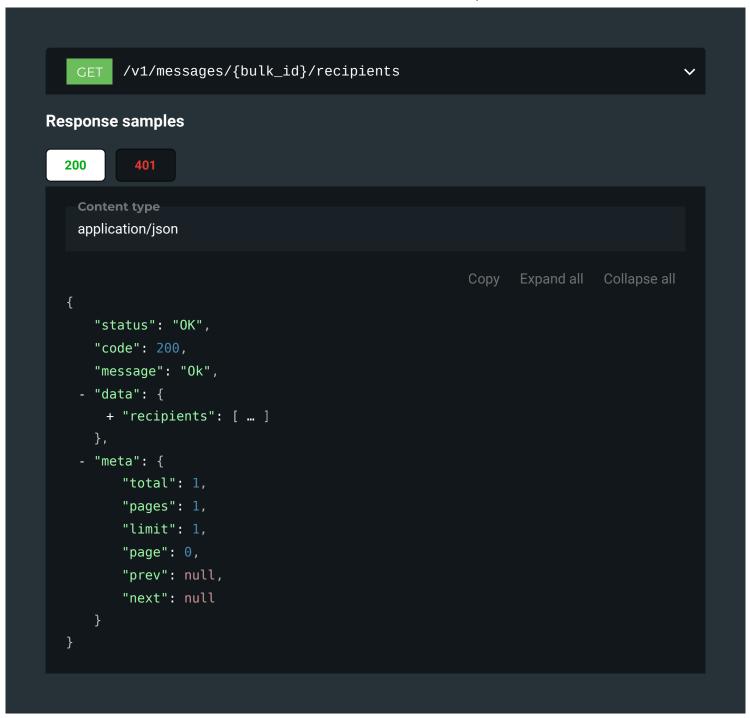

GetMessageRecipientsStatus

get a sms recipients status

PATH PARAMETERS

⊣ **bulk_id** required	integer <int64> Example: `52738671`	

QUERY PARAMETERS

⊣ page	integer <uint64> Example: `page=0`	
⊣ limit	integer <int64> Example: `limit=10`	

Responses

> **200** ok

> **401** unauthorized

GET `/v1/messages/{bulk_id}/recipients`   ⌄

Response samples

200   **401**

Content type

application/json

Copy   Expand all   Collapse all

```
{
    "status": "OK",
    "code": 200,
    "message": "Ok",
  - "data": {
      + "recipients": [ … ]
    },
  - "meta": {
        "total": 1,
        "pages": 1,
        "limit": 1,
        "page": 0,
        "prev": null,
        "next": null
    }
}
```

FetchInboxMessages

fetch inbox messages

QUERY PARAMETERS

page   integer <uint64>

                         Example: `page=0`

└ limit

          integer <int64>

          Example: `limit=10`

Responses

> **200** ok

> **401** unauthorized

| GET | /v1/messages/inbox | ⌄ |

Response samples

| 200 | 401 |

Content type

application/json

                                   Copy   Expand all   Collapse all

```json
{
    "status": "OK",
